SVENSKA GEOFYSISKA FÖRENINGEN

Tellus

A QUARTERLY JOURNAL OF GEOPHYSICS

Volume 20 · 1968

Printed in Sweden by

Almqvist & Wiksells Boktryckeri AB · Uppsala 1968

Editor
B. BOLIN
Stockholm
Sweden

Executive Editor
R. MICHAEL SMITH
Stockholm
Sweden

Office of the Editor: Tulegatan 41, P.O. Box 19 111, S-104 32 Stockholm 19

Contents

Volume 20, 1968

NUMBER 1

WELANDER: Wind-driven circulation in one nd two-layer oceans of variable depth 1

ARLES D. KEELING and BERT BOLIN: The imultaneous use of chemical tracers in oce- nic studies 17

RYDGREN: A photometric study of the solar ureole under various weather conditions 55

F HÖGSTRÖM: Studies of the natural eva- oration and energy balance 65

MICHAEL SMITH: A preview on the determi- ation of mass return flow of air and water apour into the stratosphere using tritium s a tracer 76

A. HUFF and G. E. STOUT: Relation between ^{144}e and Sr^{90}. Rainout in convective rain- storms 82

Y BERGGREN: The distribution of ozone on ressure surfaces 88

WITT: Optical characteristics of mesospheric erosol distributions in relation to noctilucent louds 98

MIYAKODA and R. W. MOYER: A method of nitialization for dynamical weather forecast- ng 113

O. HOLOPAINEN: A note on the use of a fore- ast as the first guess in objective ana- ysis 129

OFFREY E. HILL: On the orientation of cloud ands 132

RMAN J. MACDONALD: The evidence for the xistence of Rossby-like waves in the hurri- ane vortex 138

G. MOWLA: Cyclogenesis in the Bay of Ben- al and Arabian Sea 151

EFAN L. HASTENRATH: A contribution to the vind conditions over the Caribbean Sea and Gulf of Mexico 163

EN MARTINELLE: Air pressure dependence of osmic ray intensity 179

DERS ÅNGSTRÖM: Note regarding the article y T. G. Kyle "An error in the Ångström yrheliometric Scale" Tellus, vol. 19 No. 2, 967 198

NUMBER 2

T. N. CARLSON, and F. H. LUDLAM: Conditions for the occurrence of severe local storms 203

R. G. SEMONIN, E. A. MUELLER, G. E. STOUT and D. W. STAGGS: Radar analysis of warm rain showers 227

PER B. STOREBÖ: Precipitation formation in a mountainous coast region 239

G. HOIDALE and S. M. SMITH: Analysis of the giant particle component of the atmosphere over an interior desert basin 251

C. RANGARAJAN, SMT. SARADA GOPALAKRISHNAN, S. SADASIVAN and P. V. CHITALE: Atmospheric and precipitation radioactivity in India 269

L. T. KHEMANI and BH. V. RAMANA MURTY: Chemical composition of rain water and rain characteristics at Delhi 284

WILFORD G. ZDUNKOWSKI and LARRY L. STOWE, JR.: Carbon dioxide flux divergence near the Earth's surface 293

NORMAN J. MACDONALD: Estimates of the seasonal variation of the general circulation from easily identifiable features 300

R. N. KULKARNI: Ozone fluctuations in relation to upper air perturbations in the middle latitudes of the southern hemisphere 305

L. A. DIKY and G. S. GOLITSYN: Calculation of the Rossby wave velocities in the Earth's atmosphere 314

G. FISCHER and R. W. EHLERS: Vergleich dreier Differenzen-Verfahren zur numerischen Integration der „primitiven Gleichungen" für ein barotropes divergentes Modell der Atmosphäre 318

B. JOHNS: The damping of gravity waves in shallow water by energy dissipation in a turbulent boundary layer 330

Y. I. FELDSTEIN and A. N. ZAITZEV: Quiet and disturbed solar-daily variations of magnetic field at high latitudes during the IGY 338

B. R. MORTON: On similarity and the outer boundary conditions for flow in plumes 367

NUMBER 3

G. Hänel: The real part of the mean complex refractive index and the mean density of samples of atmospheric aerosol particles 371
R. Eiden: Calculations and measurements of the spectral radiance of the solar aureole 380
H. J. Viebrock and E. G. Flowers: Comments on the recent decrease in solar radiation at the South Pole 400
C. J. Bollinger: Sun tides: an unexplored astronomical approach to climate cycles and trends 412
R. D. Bojkov: The ozone variations during the solar eclipse of 20 May 1966 417
C. E. Junge and G. Czeplak: Some aspects of the seasonal variation of carbon dioxide and ozone 422
S. Beilke and H.-W. Georgii: Inversigation on the incorporation of sulfur-dioxide into fog- and rain-droplets 435
E. Meszaros: On the size distribution of water soluble particles in the atmosphere 443
C. Lorius, D. Raynaud et L. Dolle: Densité de la glace et étude des gaz en profondeur dans un glacier antarctique 449
I. I. Gringorten: Probabilitie of moving time averages of a meteorological variate 461
R. K. Smith: The surface boundary layer of a hurricane 473
M. Sturm: Untersuchungen der Wärmebilanz der südlichen Ostsee im Bereich des Feuerschiffes, „Fehmarnbelt" 485
H. Hoeber: Einige Ergebnisse von Windprofilmessungen über See bei stabiler Schichtung 495
S. J. Jacobs: A two-layer model of the Gulf Stream 502
B. D. Dore: Oscillations in a non-homogeneous viscous fluid 514
R. R. Long: Sources and sinks on a B-earth 524
J. H. S. Bradley and A. Wiin-Nielsen: On the transient part of the atmospheric planetary waves 533
W. V. R. Malkus: Equatorial planetary waves 545
R. Dickinson: A note on geostrophic scale a lysis of planetary waves 548
A. Wiin-Nielsen: A note on internal gra waves in a hydrostatic compressible fluid v vertical wind shear 551
R. F. Tarrant, K. G. Lu, C. S. Chen W. B. Bollen: Nitrogen content of precip tion in a coastal Oregon forest opening

NUMBER 4

C. B. Taylor: A comparison of tritium strontium-90 fallout in the Southern H sphere 559
H. G. Östlund: Hurrican Tritium II: Air Exchange of Water in Betsy 1965 577
W. Ambach, W. Dansgaard, H. Eisner J. Møller: The altitude effect on the topic composition of precipitation and gl ice in the Alps 595
K. Saha: On the instantaneous distributio vertical velocity in the monsoon field structure of the monsoon circulation 6
J. Adem: A parametric method for compu the mean water budget of the atmosp 621
U. Högström and I. Larsson: Studies on water balance of a small natural catch area in southern Sweden 633
D. L. Williamson: Integration of the tropic vorticity equation on a spherical detic grid 642
W. E. Langlois: Total potential energ finite columns 654
S. V. Raman: Solitary waves in a two-fluid tem in a channel of arbitrary cross se 659
E. R. Benton: A composite Ekman boun layer problem 667
D. P. Petersen: On the concept and i mentation of sequential analysis for linea dom fields 673
P. Kaufmann, R. M. de Souza and A. M. des: A note on lower ionosphere equiv height diurnal variation 687
